Harvia Globe sauna heater GL70 and wall mounting rack

NOVELTY!

Harvia Globe – A sauna heater of endless possibilities

Harvia Globe sauna heater offers you a pleasant bathing experience, not only through heat and steam, but also through its unique design and excellent usability. Cast out your preconceptions about the position of the heater in a sauna! The Harvia Globe can be positioned on a wall, on a stand or even hung from the ceiling. This freedom of choice also lets your imagination run wild when planning the bench layout for your sauna.

Harvia Globe is also an example of environmentally friendly design: The finest raw material – sturdy stainless steel – is used by producing as little waste as possible and no harmful chemicals are used in its surface finish. A completely new way of thinking is also apparent in the design of the heater, which is made out of precisely laser-cut steel arches and rings. The amount of sauna stones is carefully optimized: The heater heats up quickly without sacrificing the softness of the steam.

Harvia Globe heaters GL70 (Ø 430 mm) and GL110 (Ø 500 mm) are controlled with a touch-screen control panel. The user-friendly touch-screen control panel with a highly accurate temperature adjustment has been designed for your convenience according to Harvia's design principles. The simple and stylish control panel can be installed in the sauna room itself or in a dry space. The heater includes a compact power unit, which provides electricity to the heating elements. The heater is connected to the power unit via a cable running inside an armored tube. The heater's temperature sensor is installed in the ceiling of the sauna room and connected to the power unit via a cable.

Harvia Globe is also available as E models GL70E and GL110E, which are controlled with a separate control unit (for example Griffin or C150). The E models include a connection box for electrical input from the control unit. The heater is connected to the connection box via a cable running inside an armored tube.
